FACTORY DIRECT VIDEO SURVEILLANCE

www.ezwatchstore.com

Our Story

Automated Video Systems or AVS, established in 1998, designs and manufactures professional grade video surveillance systems. AVS created the EZWatch Pro surveillance line of products in early 2000. The goal of the product line was to provide a low cost professional grade surveillance system that could be easily installed and used by a person with little or no "high tech" background. Since it's beginning thousands of EZWatch Pro systems have been sold and installed, providing superior performance, value, reliability and customer satisfaction. EZWatch Pro has truly established itself as one of the most friendly yet powerful surveillance systems on the market.

All products developed and sold through AVS have been developed and tested by actually installing the equipment in real security applications over the past several years. From small town USA to the 911 Baghdad Emergency Dispatch Center, our equipment is installed and operating. All equipment, software and installation procedures are "tried and true" tested in over 60,000 different installations.

The company's main corporate offices and customer support center is located in a new state of the art 14,000 sq. foot facility located in Salt Lake City, Utah. This facility also supports our software programming department as well as our purchasing department. Two nearby warehouse facilities provide product control, packaging and shipping services.

Customer Support: We maintain one of the industry's largest customer support departments, providing live unlimited customer support. Each and every one of our 22 support representatives have completed extensive training on all of our products and have extensive knowledge on product application and trouble shooting. All this with one goal in mind, 100% customer satisfaction! Being focused on customer satisfaction is an integral part of our past success and the cornerstone of our future.

Our Commitment

At Automated Video Systems we firmly believe in providing true value to our customers. We offer innovative products supported with extensively trained representatives. We truly believe we are the best value on the market.

We appreciate and value each and every customer, who places their trust in our ability to provide reliable, cost effective solutions for their needs. This trust is not taken lightly, but cherished by this company and it's employees. We know our success and the future security of our jobs and families rely on our commitment to your satisfaction. Combining our vast knowledge of the security industry with an obsession for customer service, I truly believe we are the right choice for securing any facility.

Your security is our passion!

EZWatch Pro

EZWatch Pro is a PC based video surveillance and recording system. Being PC based allows for unmatched flexibility. Our systems store months of crisp clear video while providing all the latest performance and features including remote viewing, motion activated recording and much more. The system expands in groups of 4 and supports up to 64 cameras.

Two Performance Levels

All EZWatch kits are offered in two performance levels. Both include all the system features of EZWatch 4.0, but the frames per second and recording resolution vary based on the grade. For most applications the Value Grade provides great performance. But for those high end, high performance applications we recommend the Professional Grade.

Value Grade:

640 x 480 Resolution @ 7.5 fps per camera

Professional Grade:

704 x 480 Resolution @ 30 fps per camera

Complete DVR's or build your own!

Our kits offer the ability to choose between a kit which includes the DVR or not. If you choose a kit without the PC-DVR, the kit includes the software and hardware video capture card which you install on a PC you provide. Included is an easy to follow quick start guide which walks you through the 5-10 minute install.

If you choose to have the PC included, the system is shipped with the hardware installed and the software loaded and configured. All you have to do is plug in the cameras and turn the unit on.

E-Z to Install Customized Kits

We provide complete easy to install systems from 2-48 cameras. The kits include the cable, cameras, parts, instruction manuals and "how to" guides. The kits can be customized with different cameras and materials to fit your specific installation. Just give us a call to customize a kit or go on-line.

Software Features

Version 4.0 is packed with every cutting edge "can't do without" feature that customers want. Easy Remote Viewing and Internet Monitoring, IP Camera Integration, Area Select Motion Recording, Pre Alarm Recording, Object Tracking, Missing Object Alarm, Dual Monitor Display, PTZ Auto-Tracking, Custom Video Tours and a whole lot more!

Feature Details

EZWatch 4.0 HiDef is available as complete digital video recorders (DVRs) in 4, 8, 12, 16 and 32 camera configurations or as kits that install on a PC you provide, either way you have the most advanced video surveillance system available....at a great price.

Listed below are several of the systems features, for more details and software screen shots please visit our web site.

48 Camera Kit

Part Number: DVR48/48-PR

- Complete DVR Included!

*Live Viewing
and Recording.
30 fps @ 704 x
480 Resolution!*

The DVR48/48-PR is the only one of its kind. It a 48 camera professional grade video surveillance package that includes the PC, three 16 channel DVR capture cards and EZWatch Pro software preinstalled onto the system. This system uses the new industry standard H.264 high quality compression technology for video storage and supports a full 30 frames per second (FPS) live viewing and recording on all cameras connected to the DVR card. This technology was developed to provide the highest quality video compression with the lowest storage requirement. All of our professional grade surveillance kits utilize this advanced technology and include 1 available audio input for every security camera connected to the surveillance system.

The 48 camera kit includes everything you need to have your surveillance system up and running in your home or business quickly and easily. At a resolution of 704x480 you will see excellent detail from the high resolution security cameras included with this kit. The system can also record 48 channels of high quality audio by connecting an optional microphone to each of the audio inputs. All of our security kits include a 2 year warranty on all equipment and lifetime free technical support.

Remote Viewing

One of the most popular features of our EZWatch Pro system is the ability to remotely view live and recorded video from any high speed internet connection or 3rd generation cellular telephone. Our built-in web server ensures that you can connect from any system with Internet Explorer, avoiding the need to install additional software to view your surveillance system. We also include a client software package that allows multiple, simultaneous connections. This enables you to monitor multiple surveillance sites at the same time from one location.

Expandable

The EZWatch Pro surveillance system is easily expandable; you can add Pan/Tilt/Zoom (PTZ) camera control hardware and Pan/Tilt/Zoom cameras to your surveillance system at any time.

Easy & Flexible Operation

Our EZWatch Pro system supports a variety of recording modes, alarms, notifications and schedules. Motion detected recording is easily accomplished; allowing you to adjust sensitivity levels for individual security cameras and block out areas you would like the software to ignore. Custom schedules can be created for recording with a mix of motion recording and continuous recording throughout the day.

The smart guard system allows for many triggers to be configured such as; object missing detection, foreign object detection, signal loss, security camera view blocked, security camera out of focus and general motion. On detection, the system can respond in a variety of ways which include; sending an email alert, making a telephone call, sounding an alarm, redirecting an optional Pan/Tilt/Zoom camera to that location or triggering an external relay. Of course if you ever need help with configuring anything on your system our free technical support is available for as long as you own your EZWatch Pro surveillance system.

The Kit Includes

- 1 Professional grade 48 channel DVR, 1440FPS total
- 3 Connection dongles with 48 video inputs and 48 audio inputs
- 1 EZWatch Pro Professional Grade software CD
- 1 Quick start guide

Monitor Not Included

Part #: DVR4-BU

- 4 Video Channels
- 1 Audio Channels
- Expandable to 8 Channels
- Network Ready

Part #: DVR8-BU

- 8 Video Channels
- 2 Audio Channels
- Expandable to 16 Channels
- Network Ready

Part #: DVR12-BU

- 12 Video Channels
- 3 Audio Channels
- Expandable to 16 Channels
- Network Ready

Part #: DVR16-BU

- 16 Video Channels
- 4 Audio Channels
- Expandable to 24 Channels
- Network Ready

Part #: DVR32-BU

- 32 Video Channels
- 8 Audio Channels
- Expandable - ip Cameras Only
- Network Ready

Features

- High resolution 320x240 & 640x480 recording
- 7.5FPS per channel
- Complete dual monitor support
- Create additional users with custom privileges
- User activity and event logging
- View all cameras at the same time, or rotate in full screen
- Variety of alarm triggers
- Event reports
- Optional Pan/Tilt/Zoom camera control*
- Picture enhancements: brightness, contrast, saturation, hue
- Digital PTZ function
- Take snapshots during live or recorded video
- Email notifications
- Optional sensor and relay input/output*
- Time and date stamp
- Pre-recording and post-recording on event detection
- Video backup
- Counting application
- System status display
- Multiple configurations can be saved and loaded
- Address book
- Custom alarm and telephone notification sounds
- Automatic reboot schedule
- Lifetime free technical support

Playback

- Output video for playback on any PC
- Basic video clip editing, export only what you need
- Fast forward, rewind, next, previous, pause and stop
- Adjustable playback speed
- Snapshot
- Enhancement filters: sharpness, brightness, contrast, gray-scale switch
- Smart search, looks for motion in clips
- Advanced date/time search
- Playback multiple clips simultaneously
- Does not interrupt recording

Remote Access

- Remote internet and cell phone access
- Monitor multiple remote sites
- Web browser access
- EZWatch IP support
- Pan/Tilt/Zoom camera control*
- View both live video and recorded video

Video Capture Cards—DVR Kits

Our Value grade surveillance capture cards install into a PC you provide turning it into a digital video surveillance recorder. This system supports 7.5 frames per second (FPS) viewing and recording at 640x480 resolution recording.

The kits come complete with software, Quick Start installation guide, user manual and warning stickers. Installation is quick and easy.

Value Grade - Build Your Own - DVR Kits

Part # EZKIT-BU

Monitor Sold Separately

The EZKIT-BU is a 4 channel Value grade surveillance capture card which installs into your own PC turning it into a digital video recorder. This system uses the new high quality industry standard compression technology for video storage and supports all features of the EZWatch Pro system.

Value grade 4 channel DVR capture card

- Viewing rate: 30FPS total, 7.5FPS per channel
- Recording rate: 30FPS total, 7.5FPS per channel
- Supported resolutions: 176x120, 352x240, 640x480
- Maximum resolutions: 4ch @ 640x480
- Video input: 4 male BNC
- Audio input: 1 male BNC
- Motherboard slot type: PCI

Recommended System Requirements

- Windows XP Home/Pro, Vista, Windows 7
- Intel Celeron 1.6ghz processor or better
- 512MB RAM
- 80GB HDD
- 1 Available PCI slot
- High speed internet connection for remote viewing

The system can be expanded in groups of four. This allows you to keep up with your security needs without having to replace the whole recording system when more cameras are needed.

IP Based Network Video Recorders & IP Security Cameras

IP Security-Cameras are the future. These systems often provide the easiest and most cost effective answer to difficult security problems. The systems could not get any easier to install. Simply mount the selected network based IP camera in the area you desire. Link the camera to a wired or wireless computer network with cat5 cable or wireless network. Load the network surveillance software on a PC linked to the network and set up the viewing and recording options.

IP based camera systems are often the right choice for those with an existing network or businesses which have multiple locations and require the video surveillance to be managed from off-site locations.

Our large selection of IP network video recorders and IP cameras allows us to custom design a system to your specific needs. Feel free to contact us during our extended support hours. A member of our technical support staff will be glad to help.

Perfect security & surveillance solution for companies with multiple locations!

EZWatch Pro NVR Network Video Recorder & IP Camera Software

Network Video Recorder

The EZ-IPNVR system can manage and record up to 64 network security cameras simultaneously or 32 network cameras when added to any of our analog EZWatch Pro 4 systems. Just connect your EZWatch Pro NVR (Network Video Recorder) to your router or switch along with any supported IP cameras and the two systems seamlessly integrate with each other. All viewing, recording and configuration of the cameras can be performed on the EZWatch Pro NVR.

High Tech Surveillance

Network IP cameras are the next generation in video surveillance with the ability to stream and record high quality video over existing wired (or wireless) networks such as the office LAN or the internet. Remote monitoring, alarms and motion detection recordings are fully supported. Take a look at the example layout for a system below.

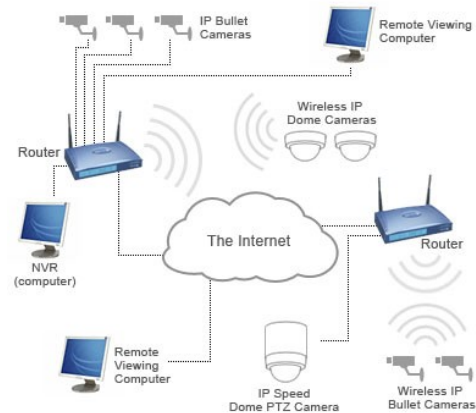

Flexible Installation & Operation

The EZWatch Pro NVR simplifies the use of IP cameras by providing one software package which manages all of your network surveillance cameras whether they are on site or at a remote site through the internet, or both at the same time. This flexibility provides many options in choosing the right system for your application.

It also supports a variety of recording modes, alarms, notifications and schedules. Motion detected recording is easily accomplished; allowing you to adjust sensitivity levels for individual security cameras and block out areas you would like the software to ignore. Custom schedules can be created for recording with a mix of motion recording and continuous recording throughout the day.

This kit includes:

- 1 USB Software License dongle
- 1 EZWatch Pro NVR software CD
- 1 Quick start guide
- 1 Full printed users manual
- 1 Video surveillance warning sign
- 2 Video surveillance warning stickers
- 2 Year warranty on all hardware
- Free unlimited lifetime technical support
- Mega Pixel Camera Support

NVR's

The NVR systems can manage and record up to 64 network security cameras simultaneously. Just connect your EZWatch Pro NVR (Network Video Recorder) to your router or switch along with any supported IP cameras and the two systems seamlessly integrate with each other. All viewing, recording and configuration of the cameras can be performed on the EZWatch Pro NVR.

IP-Night Vision Vandal Outdoor

Part Number: FD6112

This powerful network camera has many advanced features. Built-in dual-codec, MPEG4 / MJPEG compression. The automatic day/night switches the built-in IR LEDs on or off for excellent 24-hour surveillance. Its vandal-proof and weather-proof body has no problem for both indoor and outdoor installations. The new 2-way audio function let the users not only listen but also talk to the camera site when a microphone and speaker is plugged into the camera.

Check out our full selection of IP cameras on line!

Megapixel Resolution IP Security

Part Number: IP7138

This professional network camera provides mega-pixel resolution for indoor surveillance applications and detailed remote monitoring. Equipped with a 1.3 Mega-pixel (1280x1024 resolution) sensor delivering superior image details, it is the best choice for monitoring important areas such as airports, factories, retail stores, schools, offices or banks. Embedded with Vivotek technology this IP camera delivers dual streams with different resolutions and video quality, for different devices simultaneously such as PC (MPEG4 or MJPEG), or 3rd generation cell phone (MPEG4 only).

IP Indoor Security Camera

Part Number: IP6112

The Vivotek IP6112 is a powerful dual-codec network camera supporting 2-way audio and remote recording via EZWatch Pro NVR software. Connected to an Ethernet network, this camera provides remote access to high-quality video and audio. The 2-way audio and upgradeable day/night features make this camera more suitable for many surveillance applications where light conditions change. Vivotek IP6112 users can easily access synchronized audio and video footage in real-time via internet or local area connection from the included software or the recommended EZWatch Pro NVR software. A wireless version of this camera is available via an optional upgrade.

IP Outdoor Pan,Tilt,Zoom Dome

Part Number: SD7151

The Vivotek SD7151 is a sturdy, powerful camera designed for maximum coverage. Capable of full 360 degree rotation, 90 degree tilt, and 18x optical zoom this camera can cover a vast area and great distance. Incorporating a 1/4" Sony Progressive Scan CCD allows for superior image quality and offers up to a full 30 frames per second viewing and recording at 640x480 resolution. With embedded support for both MPEG-4 and MJPEG encoding, this camera can support nearly any task thrown at it. This versatile camera can store up to 128 pre-programmed positions, and can move automatically between them to cruise among a predefined path.

IP Cameras & NVR's

Hardware Based Kits

A hardware based DVR is built specifically for video recording. These units are built from the ground up to perform one specific function, record video. While they do operate some software internally, the video processing is hardware based. It is this hardware which provides the live viewing and high resolution recording.

Our units now offer H.264 video compression for superior quality recording, smaller file sizes and faster remote video transmission. With video motion detection, remote viewing, PTZ camera control, DVD quality 720x480 recording resolution and DVD/USB backup this DVR is perfect any size home or business.

- 720x480 High Res Recording
- Live Video Viewing
- Remote Access via Internet
- Motion Recording
- Automatic Schedules
- Multiple Audio Recording
- Password Protection
- Saves Space

All the kits include cable, cameras, power supplies and fittings. There are several monitor options which are sold separately.

Signal System	NTSC or PAL
Operating System	Embedded Linux Based
Cameras Supported	1-16
Live Viewing	Yes
Recording Rate	1-30 fps, per camera
Recording Quality	Hi Res. 640x480
Dual Monitor Support	No
Remote Viewing	Yes but limited.
Audio Recording	Yes

Hardware Based

Part Number: AP-KIT4/4-160

4 Camera Hardware Based

The AP-KIT4/4-80 is a complete 4 security camera kit which includes a 4 channel, fully integrated, hardware based standalone digital video recorder (DVR). No PC is required with this system; just plug in any standard TV, CCTV monitor or computer monitor and begin recording up to 30 frames per second (FPS) right away. This standalone DVR runs an imbedded Linux operating system and includes a remote control for easy setup and operation. With night vision, alarm input/output DVD quality 720x480 resolution and DVD/USB backup this DVR is perfect for the home or small business. As with all our products, free unlimited lifetime technical support is included should you ever need help setting up your DVR.

A variety of recording modes are supported by this DVR. These include; scheduling, motion detected recording, continuous recording or a combination of any modes.

The Kit Includes

- 1 Armor Pro 4 channel standalone DVR, 120FPS total
- 1 Remote control
- 1 Remote monitoring software CD
- 1 Full printed users manual
- 2 Indoor high resolution color dome cameras
- 2 Indoor/outdoor IR night vision bullet cameras
- 4 100ft siamese video/power cables
- 4 AC power adapters
- 1 Video surveillance warning sign
- 2 Video surveillance warning stickers
- 2 Year warranty on all hardware

Part Number: AP-KIT8/8-250

8 Camera Hardware Based Video - surveillance Kit

The AP-KIT8/18-250 is a complete 8 security camera kit that includes a 8 channel, fully integrated, hardware based standalone digital video recorder (DVR). No PC is required with this system; just plug in any standard TV, CCTV monitor or computer monitor and begin recording up to 30 frames per second (FPS) right away. This standalone DVR runs an embedded Linux operating system and includes a remote control for easy setup and operation. With night vision, alarm input/output, Pan/Tilt/Zoom (PTZ) camera control, network access, DVD quality 720x480 resolution and DVD/USB backup this DVR is perfect for small or medium businesses. As with all our products, free unlimited lifetime technical support is included should you ever need help setting up your DVR.

A variety of recording modes are supported by this DVR. These include; scheduling, motion detected recording, continuous recording or a combination of any modes.

The Kit Includes

- 1 Armor Pro 8 channel standalone DVR, 240FPS total
- 1 Remote control
- 1 Remote monitoring software CD
- 1 Full printed users manual
- 4 Indoor high resolution color dome cameras
- 4 Indoor/outdoor IR night-vision bullet cameras
- 1 500ft EZ Spool siamese video/power cable
- 16 Twist-on video BNC connectors

EZ-Dome Color Indoor Camera

Part Number: EZ-DOME

Our EZ-Dome camera is an indoor mini dome color surveillance camera with a 3.6-MM wide angle lens. This dome style security camera effectively covers an area up to 85 degrees wide with 420 lines of color video resolution. This is the indoor dome camera that comes standard in each of our complete camera kits and it presents an outstanding value.

Vandal Proof—Night Vision

Part Number: EZDOME-VP

Color, 420 line, vandal resistant indoor mini dome camera. Wall mount included. 12V DC power. 3.6mm Wide Angle Lens.

- 420 Lines of Resolution – Color
- Minimum Light - 0.00 Lux
- 20-40' Night Vision
- Lens - 3.6mm
- Iris - Auto
- Size - 6" Diameter
- Color - Silver - Housing: Metal
- Wall or Ceiling Mounted

Vari-focal Vandal Proof

Part Number: EZ-CD39IR-VPEX

This sturdy camera offers the flexibility of a Varifocal lens for great flexibility. The lens can be adjusted from wide-angle 2.5mm (~90 degree wide viewing angle) for short-range shots, to 9mm (~30 degree wide viewing angle) for a longer-distance shot. Housed in a high-impact IP66 Vandal-Proof housing, this camera can be used in nearly any environment. During the daytime it sees in full color, while at night it switches to a black-and-white infrared mode that can see up to 40 feet in total darkness.

Day/Night Color Camera

Part Number: CB25NVB

Indoor 420 line resolution color security camera. 3.6mm Lens. Auto Iris. Includes wall mount. Operates with any standard video security or surveillance system. Excellent Performer. Operates on very little light.

- Minimum Light - 0.1 Lux
- Lens - 3.6mm
- Iris - Auto
- Size - 2.5"x3"x5"
- Mount - Wall (Mount Included)
- Power - 12v DC

Dome Camera with Night Vision

Part Number: EZDOME-IR

High resolution color indoor mini dome security and surveillance camera with 30 foot night vision, auto iris and 3.6mm lens. Covers an area 30'x 30'. 420 lines of resolution. BNC coax connector and 12V DC power connection. Wall or ceiling mount. 3" Diameter. Operates with any standard video surveillance system. Produces night vision pictures in zero light.

High Res. 3.6-8mm Zoom

Part Number: EZ-VARI-DOME

This is a great little indoor dome camera with a 1/3" high resolution 480 line Sony CCD imager and a 3.5 to 8-mm vari-focal length lens. It can be mounted on ceilings or walls and it provides outstanding color video images down to an incredible .1-lux. A black ABS plastic housing easily opens for service by simply twisting the locking base.

Color high resolution 480 line, manual zoom lens. Provides manual zoom capability from 3.5mm to 8mm views.

Zoom Color Indoor Camera

Part Number: 480ZOOM

Indoor high resolution color security camera. 480 lines of resolution. Manual zoom lens 3.6-8mm. Auto Iris. Includes wall mount. Operates with any standard video security or surveillance system. Excellent Performer.

- 480 Lines of Resolution – Color
- Minimum Light - 0.1 Lux
- Lens - 3.6 to 8mm Manual Zoom
- Iris - Auto
- Size - 2.5"x3"x5"
- Mount - Wall (Mount Included)

High Resolution Color Dome

Part Number: EZDOME-PRO

High resolution color indoor mini dome security camera. This dome security camera is the most popular type of security camera in the industry. This is due to the huge variety of applications it's suited for. This security cam can be mounted almost anywhere and the lens positioned for the perfect viewing angle every time.

- 3.6MM Lens
- Auto Iris
- Minimum Light .1 Lux
- Cover 30x30' Area

The EZ-License-IR is a super-high resolution outdoor bullet camera designed to give you the utmost quality in any conditions. Built in to its durable outdoor housing is a high quality 560 line camera using a Sony 1/3" imager. To allow for viewing at any distance, it has an integrated 6 ~ 96mm Optical zoom lens, allowing it to see clearly at long distance. Catch intruders or watch property from a 200' distance, or mount the camera closer to catch a license plate or face from up to 100' away.

550 Line High Res. Night Vision

Part Number: EZBULLET-PRO

SUPER HIGH RESOLUTION - See up to 50ft in complete darkness with this 550 line high resolution bullet security camera. This camera is weather resistant so it's perfect for outdoor use. It can also be easily mounted on ceilings with a reversible arm mount.

- 550 Lines of Resolution - Color
- Minimum Light - 0.0 Lux
- Lens - 6mm
- Iris - Auto
- Power 12v DC

Outdoor Color Bullet

Part Number: CM25SH

Indoor/Outdoor color bullet security camera with mount and sun shield. 420 lines of resolution, 3.6MM lens with auto iris, 12V DC Power, easy connect pigtail cable, wall or ceiling mount. Perfect for outdoor harsh environments.

- 3.6mm Lens with Auto Iris
- .1 Lux Low Light Operation
- Operating Temperature (-10 Degrees to 120 Degrees)
- 12v DC Power, 150 mA Power Draw

Vandal Proof—Night Vision

Part Number: EZDOME-PRO-VP

Color, 480 line, vandal resistant indoor or outdoor mini dome security camera with 30' infra-red night vision. Wall or ceiling mount. 12V DC power. 3.6mm lens.

Made of durable shatter resistant metals with a high impact resistant housing. Security screws included. Provides excellent color pictures during the day and IR night vision pictures in complete darkness.

Vandal Proof High Resolution

Part Number: CD360HVAD-EXSL

Super high resolution 540 line CCTV camera. Mount it anywhere you need tough protection from the elements. Equipped with a manual 2.5mm to 9mm zoom lens giving you the perfect view every time.

- Resolution: 540 lines, horizontal
- Minimum Light 0.001 Lux
- Imager: Sony Color CCD
- Signal type: NTSC/PAL
- Lens: 2.5mm to 9mm
- Indoor/Outdoor

Zoom Lens High Res. Night Vision

Part Number: EZBULLET-PRO-VP

SUPER High performance color bullet camera with manually adjustable 4-9mm zoom lens. Effectively covers an area fully zoomed up to 70' away. Night Vision - 30'.

- Manual Zoom Lens 4mm - 9mm
- Color 550 Lines
- Sony Chip
- Aluminum Housing with Sun Shield
- 30' Night Vision
- Auto Iris
- 12V DC Power

High Res. Outdoor Color Bullet

Part Number: C480OD

Indoor/Outdoor high resolution color bullet security camera with mount and sun shield. 480 lines of resolution, 3.6MM lens with auto iris, 12V DC power, easy connect pigtail cable, wall or ceiling mount.

- 3" Long, 3/4" Wide
- 480 Lines of Resolution Sony Video Chip
- 3.6MM Auto Iris Lens
- .01 Lux Low Light Operation

Long Range Night Vision

Night Vision-Long Range Zoom

Part Number: 200-HD

This camera is a high performance exterior, high resolution, 200' day-color, 150' night-night vision camera with a easy zoom lens. Perfectly designed for harsh, difficult environments.

It's ideal for all types of outdoor

long range video security applications. The camera can zoom from 8mm to 40mm using the easy to use zoom and focus knobs on the bottom of the camera. The camera kit includes the camera, mount, and power supply.

Perfect for loading docks, entry gates, back yards, storage yards, warehouse aisles, etc.

- 480 Lines Resolution
- 8mm to 40mm Manual Zoom Lens
- Sony Chip Super HAD CCD
- Extreme Temperature Operation
- 8 Mega Bright IR's 22 Large IR's
- IR Projection distance 150'
- Weight 6lbs.
- Power Draw 1.5 amp – 12v DC

100' Long Range Night Vision

Part Number: 200IR-OD

Outdoor, 200' day-color, 100' night-night vision with 6-15mm manually adjustable zoom lens. Get the perfect view every time. Rated "Best Performer" for exterior and outdoor security surveillance. The lens provides manual zoom capability allowing you to set the view of the camera to the perfect spot every time. Wall mounted. Perfect for loading docks, entry gates, back yards, storage yards, warehouse aisles, etc. This heavy duty infrared security camera is just what's needed for those long range video surveillance and security applications.

Camera Specifications:

- Tamper Resistant Housing
- Automatic Heater & Blower for Extreme Temperature
- Wall Mount
- 12v DC Plug In Power Supply

SUPER High Res.70' Night Vision

Part Number: 120-HD

This camera is a super high definition exterior performer. 100' day-color, 70' night-night vision security camera with a mid range 3-9mm easy zoom lens. Perfectly designed for harsh, difficult environments. The camera includes the camera, mount, and power supply.

Perfect for loading docks, entry gates, back yards, storage yards, warehouse aisles, etc.

- Tamper Resistant Housing
- Wall Mount
- Designed for Extreme Temperatures
- 12 V DC Plug In Power Supply
- 580 Lines of Color Resolution (Day)
- 580 Line of Black & White Resolution (Night)
- 3-9mm Manual Zoom Lens
- Auto Iris
- 100' Night Vision

Real outdoor protection!

Zero Light Required!

Auto Zoom - Night Vision

Part Number: 200AUTO

This camera is a exterior, high resolution, 200' day-color, 100-150' night-night vision security camera with a long range auto zoom lens. Designed for harsh, difficult environments. The camera can zoom from 6mm to 96mm using a hand held RF remote. The focus and iris are also controlled with the remote. The camera kit includes the camera, RF remote, mount, and power supply.

The RF remote controls the camera's zoom, focus and iris up to 100 feet away. The camera produces high quality 480 line high resolution color pictures during the day and 500 line night vision pictures up to 150' in complete darkness.

- Tamper Resistant Housing
- Wall Mount (Included)
- 12 V DC Plug In Power Supply Draw 1.5 Amps
- 480 Lines of Color Resolution

The New EZ Track PTZ Dome

- Auto-Movement Tracking
- High Performance
- 18x Optical Zoom
- Low Light Operation

Break Through Pricing!
\$1189

Automatically Tracks Movement!!

The EZ Track PTZ camera is one of the most innovative cameras in the surveillance industry. This high performance pan, tilt, zoom camera not only offers all the performance of cameras which cost twice as much but it also automatically tracks people and vehicles!

This break-through technology makes EZ Track Domes incredibly effective in protecting parking lots, storage yards, warehouses or any large area in need of hands free surveillance.

The EZTRACK
PTZ Dome

Part Number
EZ-TRACK-DOME

The E-Z Track PTZ Dome Camera **automatically tracks people and vehicles** as they move through the cameras field of view.

Auto Tracking Operation: This feature is set for each camera with easy on-screen menus. Each camera is set to a "Home" position which provides a wide view of the area of concern. When movement appears, such as a vehicle or individual, the camera will lock onto the object and track it until the object moves out of the camera's viewing capability. The camera then returns to its "Home" position and once again monitors for movement.

Software Operation: Up to sixteen E-Z Track PTZ cameras can be supported on each system. The EZWatch Pro software allows you to manually control any selected camera as well as program customized tours for each camera. Pan, tilt and zoom with a click of your mouse button.

E-Z on Screen Programming: Each camera is easily programmed to perform as needed. The on-screen menus allow you to set the motion sensitivity, the auto tracking rules, the areas you want motion to activate tracking, and any pan, tilt, zoom limits you wish to use.

Joystick Control: In addition to using the software controls you can also control and program multiple cameras using the AU40E or AU40Z joystick controller. This control allows you to set custom parameters for each camera and can also be used to control and operate up to sixteen cameras. Both the Joystick control and the EZWatch Pro software can be use simultaneously to control cameras. Item #PTZ-COM-KIT recommended.

Auto Tours: Each camera can be programmed to run custom tours panning, tilting and zooming up to sixteen preset locations automatically.

Alarm Tracking: The camera can be automatically panned, tilted and zoomed to a pre determined view upon the activation of an alarm input.

Compatibility: The E-Z Dome can be set to communicate in several different formats, including Pelco D and Pelco P protocols. This makes the camera compatible with almost every video surveillance system on the market.

- **High Resolution Color Camera 480 Lines**
- **Minium Light - 1.0 & .01 Lux Options**
- **Optical Zoom - 18x**
- **Auto Flip**
- **Video Blanking**
- **Programmable Park**
- **Custom Tours**
- **Alarm Inputs - 4**
- **Relay Outputs - 4**
- **Auto Heater-Blower**
- **Pelco P & Pelco D Communication**
- **Power 12VDC**
- **Power Draw 2 Amp Max**
- **Max Communication Distance 3000'**
- **Operating Temp. -58 to +135 Degrees F**

Recommended Controls: Initial set-up requires the Purchase of item #PTZ-COM-KIT which includes the TRP-CO8 PC interface and the AU40Z Joy Stick controller. Only one PTZ-COM-KIT is required to control up to 16 cameras. Recommended Communication Wire: Item #1000/22-2, Optional Mounts: Item #PTZ-POLE & PTZ-CORNER.

18x Indoor Day/Night PTZ

This indoor high performance Pan-Tilt-Zoom, Day/Night security camera comes with both surface and flush ceiling mounts for ease of installation. The CD55H pan tilt zoom camera is equipped with an auto-focus high resolution 480 line resolution color/black & white camera that can operate in extremely low light conditions. The lens is equipped with an auto iris, auto focus and can zoom 18x optically and 12x digitally.

Part Number: CD55H

10X Zoom PTZ Low Light

This High-Resolution outdoor camera is ideal for high performance applications in rugged conditions. It provides a high quality optical and digital zoom capabilities giving it great range, only beaten by its bigger brother the EZ53W. This camera comes in a durable weather-resistant outdoor housing capable of withstanding temperatures from 14 degrees Fahrenheit to 122 degrees Fahrenheit. With the choice of wall or optional ceiling mount bracket it can be mounted to match any necessary camera solution.

Part Number: EZ52PTZ

23X Ultra Low Light PTZ

Our most powerful outdoor offering, this amazing camera has an incredible 230x zoom capabilities (23x Optical Zoom, 10x Digital Zoom). The camera is capable of seeing in an incredible 0.005 lux with the built-in Digital Slow Shutter feature, letting it see in conditions twice as dark as other low light cameras are capable of. Its rugged housing and built-in Heater and Blower ensure full functionality in harsh conditions.

Part Number: EZ532W-PTZ

EZ-Track Flush Mount Indoor PTZ

The E-Z Track PTZ Dome is one of the most innovative cameras in the industry. This high performance pan, tilt, zoom camera not only offers all the performance of cameras which cost twice as much, but it also automatically tracks people and vehicles. The recessed housing makes the camera perfect for discrete installations. Great for flush mounting in ceilings or drop-tile.

Part Number: EZ-TRACK-FLUSH

Mini PTZ High Res. Dome

This remarkable camera offers the power and versatility of a full PTZ camera in half the size! Take control of the camera with a full 360 degree rotation, 90 degree tilt, and 10x optical/10x digital zoom. With sup-

port for up to 32 stored pre-set positions and 6 auto-cruising tracks, this camera will cover a huge area without taking up much space.

This camera offers a fantastic 480-line image day and night. Its auto-iris will adjust for great image in low-light situations, and its quick and easy RS485 connections ensure a rapid initial setup with an absolute minimum hassle. The optional wall-mount bracket allows the camera to be installed nearly anywhere.

Part Number: EZ51PTZ-MINI

Proportional PTZ Keyboard

This unit is the one to have. Fully proportional PTZ Keyboard Controller for up to 32 Pan Tilt Zoom Cameras. Simply twist the joystick clockwise to zoom in and counterclockwise to zoom out. FYI: Full proportional operation means the farther you move the joystick from center, the faster the camera will move. Perfect for large control installations. The unit uses a two wire twisted data cable to communicate with the cameras. Up to 32 cameras can be tied to one single two wire data cable with a maximum distance of 3500'. This unit will control all cameras available through our store.

Part Number: AU40Z

PTZ Control Kit

This kit is perfect for the initial setup and use of the EZ-Track PTZ dome cameras.

Up to 32 EZ-Track domes are programmed and controlled with this interface. The cameras are connected together with a two wire communication cable which is pulled from one camera to another creating a "daisy chain" of cameras with a maximum cable distance of 3000 feet. We recommend using the 1000/22-2 PTZ communication wire.

The two wire communication cable is connected to the AU40E joystick and the RS485 connection on the TRP-C08 interface module. The module is then connected to the PC with a USB cable. The EZWatch Pro software and/or joystick provides complete control and support for up to 32 PTZ cameras.

Part Number: PTZ-COM-KIT

Weather
proof and
durable!

Pan-Tilt-Zoom PTZ

CCTV Hidden Cameras

Pinhole Hidden Camera

Color, mini, pinhole camera with 380 line resolution. Mounts in drop tile or fixed ceiling. Swivels 90 degrees for perfect view. Includes mounting bracket. 2.0 Lux, 3.6mm lens, auto iris, 12V DC power, 3.5" diameter. Easy connect pigtail video and power leads.

*For use with
any of our
systems .*

Part Number: PIN380C

Smoke Detector Spy Camera

The smoke alarm detector with a hidden 380 line color camera is perfect for home or office use. Mount this cleverly disguised camera on the ceiling or a wall to capture full motion video from it's 3.6mm wide angle lens. Virtually undetectable, this inexpensive spy camera has helped to nab thousands of thieves.

Part Number: C330SMO

AM/FM Clock Radio Spy Camera

A fully operational dual alarm AM/FM Clock Radio disguises a full color hidden surveillance camera with a pinhole lens. No one will ever suspect that there is a pinhole spy camera hidden in the front of this clock radio. With a 380 line color camera and a 3.6mm lens, this hidden camera is sure to capture everything that happens.

Part Number: C330RAD

Computer Speaker Spy Camera

This desktop speaker provides the perfect cover for a high resolution color CCTV camera. A Spy camera has never been so easy to conceal. Place this hidden color security camera on a desk to provide a great wide angle view of an entire office or cubicle area. No one would ever suspect that the speaker on the desk is actually concealing a 1/3" color pinhole security camera with a 5.5mm wide angle lens.

Part Number: SW2800AC

Thermostat Hidden Spy Camera

An amazing quality, 330 line color hidden spy camera that blends well into any environment. This camera is cleverly designed as a thermostat that is fully functional. It is designed to install easily onto walls to provide you with an undetectable 5.5mm wide angle view from its built in 1/3" CCD camera.

Part Number: SW1600LC

Color Pinhole Camera w/ Audio

You will not believe the incredible picture you get from this tiny camera that measures a scant 1-1/4" x 1-1/4". With 380 lines of resolution and a 3.7mm pinhole lens, you can mount this camera just about anywhere.

There are privacy laws in many States that may prohibit or highly regulate situations where you can listen in or record audio. Always check with local law enforcement before installing any type of audio recording devices.

Part Number: 15-CG36A

CCTV Hidden Cameras

Exit Sign Covert Color Camera

Place one of the exit sign hidden surveillance camera at every exit from your building and you are sure to capture any criminal activity. This is a fully functional emergency exit sign that includes a high resolution color camera with a pinhole lens.

Part Number: SW2400LC

Covert Pencil Sharpener Camera

Perfect for entrances or targeted areas with its straight view lens. This camera is easily hidden in plain site in just about any office environment. A full color 1/3" CCD Camera with a 5.5mm pinhole lens and automatic back light compensation allows this hidden video camera to capture a full 330 lines of resolution.

Part Number: SW2700LC

No one will ever know its there!

Emergency Light Spy Camera

Perfect for stairwells, parking garages or back entrances, this high resolution color camera is concealed in an emergency light fixture. With its wide angle lens, you are sure to capture any events that take place in front of this fully functional emergency light. This emergency light is fully functional and will light up when power is lost, all while capturing perfectly clear video at more than 330 lines of resolution.

Part Number: SW0030LC

Motion Detector Hidden Camera

Cleverly disguised as a burglar alarm motion detector is a 380 line color camera with a 3.6mm wide angle pinhole lens. Perfect for monitoring large rooms, this totally hidden camera is provided with a wall mount bracket that can be rotated for optimal views. If your home or office has an existing burglar alarm system, this motion detector hidden video camera will blend right in.

Part Number: C330PIR

Fire Sprinkler Spy Camera

Get an amazingly clear picture from this tiny hidden spy camera that is cleverly disguised as a fire sprinkler. The camera lens points out of the side of the unit at about a 45 degree angle and it has a full color picture with 330 lines of resolution.

Part Number: FS35

Clock Radio Color Spy Camera

A fully functional desk-top clock radio hides a tiny covert high resolution color camera in plain site, right on a desk. The unit tells accurate time, plays music and has a working alarm, all while capturing perfectly clear video at more than 330 lines of resolution.

Part Number: SW1500AC

Wireless Spy Camera & DVR

Part Number: EZ-EYE

This small "all in one" video surveillance unit is nothing short of amazing. The unit is only 4 inches tall and 3.5 inches wide. This unit has a hidden built-in high resolution camera and a Digital Recorder which can record clear digital images using motion activated recording. It is the ultimate spy camera. Wireless & Easily Hidden

- 30 x 30' Viewing Area
- High Resolution Color Camera
- Built-In Digital Video Recorder
- Motion Detection Recording
- Continuous Recording
- Easy Set Up
- Reliable
- Battery or Plug in 12V DC Operation
- 1-2 Weeks of Recording in Motion Mode

The applications for this unit truly are endless. It solves the problem of pulling cables to the camera because the recorder is built right in. Operating on batteries you can simply turn the unit on, place it to view the area you want to record and walk away. When set on motion recording the unit will detect movement and record to the onboard memory. When the movement stops the unit stops recording. The system can be set to shut off when the memory is full or to overwrite the oldest clips and continue to record.

To play the video recording back you simply connect it to your TV with an RCA cable and playback the clear video with the controls on the back of the unit. It does not get any easier!

DON'T be fooled by other "look alike" units that have only 1/2 the video memory. Our unit is equipped with 1 Gig of flash memory...double all the others on the market!

Features:

- User Friendly
- Records in 320x240 or 640x480 Format
- Playback: Slow, Medium, Fast, Freeze Frame
- Built-In 480 Line High Resolution Color Camera
- Built-In DVR with 1 Gig on Board Video Storage
- Adjustable Motion Detection
- Date and Time Overlaid on Video
- Automatically Starts Recording After Power Loss
- Adjustable Recording Rates - 1-30 FPS Max.
- Wall or Ceiling Mount Bracket Included
- 3.6 MM Lens with Auto Iris
- AA Battery Operated Option
- 12V DC Plug In Power Supply Included
- RCA Video Output
- 3' RCA Cable Included

Clock Radio Spy Camera

Part Number: EZ-CLOCKDVR

...with built-in DVR

The EZ-CLOCKDVR is a full featured all in one spy camera with a built in DVR cleverly disguised within a fully-functional Clock Radio. They'll never suspect it's a recorder!

Hidden inside of this functional Clock Radio is a 470 line Sony board camera with a 3.6mm wide angle pinhole lens. The DVR records high quality MPEG-4 compressed video and audio onto a removable SD memory card. The system comes with a 4-Gig memory card that can hold up to 100 hours of full motion video.

All features of the clock radio work perfectly, allowing it to blend in seamlessly. Even when inspected closely, the camera is invisible making this item perfect for any location!

With built-in motion detection, the system can be set up to only record when it sees motion. The DVR will record a full 30 images per second at 320x240 resolution.

Speaker Spy Camera w/DVR

Part Number: EZ-SPKDVR

...with built-in DVR

The EZ-SPKDVR is a fully operational set of computer speakers with a "all in one" spy camera/DVR video surveillance system built-in!

Hidden inside this set of functional computer speakers is a 470 Line Sony board camera with a 3.7mm wide angle pinhole lens and a digital audio and video recorder that uses high quality MPEG-4 video compression. The DVR records high quality video and audio onto a removable 4-Gig SD memory card that is included with every system. The 4-Gig memory card can hold over 225 hours of full motion video.

With built-in motion detection, the system can be set up to only record when it sees motion. The DVR will record a full 30 images per second at 320x240 resolution. To play back the video, you simply plug the provided cable into a television or an LCD monitor with an RCA input jack.

The system comes with an IR remote control and a built-in lithium Ion battery for truly wireless stand alone operation.

This amazing little spy camera is so reliable and easy to use that you can simply set it and forget it.

NOTE: Because of the nature of these products they are exempt from our standard return policy. The unit is covered with a complete one year repair and service warranty but we do not provide refunds on these products.

Wearable Mini Spy Cam with Audio & Built-in DVR

Part Number: JMC-DV003

This tiny spy camera with built-in DVR can be worn on clothing or placed on shelves or tables without drawing attention to itself and also includes a microphone for clear recorded audio. The DVR accepts a standard Micro-SD memory card that can record up to 63 hours total on a 2GB card. With a built-in Lithium-Ion battery the camera can continuously record for 2 hours between recharging and can be recharged from any USB port.

When you are ready to view recorded video, simply plug the camera into any USB port using the included cable and download your video. From there video can be emailed, burned to CD or edited. Inexpensive and versatile, this spy camera is one of our best sellers.

Features

- Recording resolution: 176x144
- Tiny size: 2.8" x 3/4" x 1/2"
- Standard Micro-SD memory cards
- Lithium-Ion battery lasts 2 hours
- Easily charged from a USB port
- Transfer via USB port or memory card reader
- Removable Memory Cards
- Night Vision & Outdoor are Options

Dummy Indoor Camera with Power LED

These fake security cameras look so real, you can't tell the difference. This indoor dummy camera comes complete with a wall mount bracket for easy mounting. The indoor dummy camera also has a red power LED that flashes on and off for more realism.

Part Number: DUM-1LED

*Wearable
Video and
Audio Re-
corder!*

Video Surveillance Warning

Durable PVC 4"x4" warning window sticker. Great for store windows, doors or any area where deterring theft or vandalism is needed. 10 year fade resistant guarantee.

Part Number: WARNINGSTICKER

Video Surveillance Warning Sign

Durable PVC 11"x11"x1/8" warning sign. Great for gates, fences, walls or any area where deterring theft or vandalism is needed. 10 year fade resistance guarantee.

Part Number: WARNINGSIGN

Dummy Indoor Dome Camera

This dummy camera looks absolutely real because it is an actual "Indoor Dome Security Camera". These fake security cameras are slightly used (nearly new condition), non-functioning cameras that have an electronic defect which will not allow us to sell it as an operational camera.

Part Number: DUMMYBULLET

Spy & Hidden

4" LCD Camera Service Monitor

This hand held 4" service monitor makes adjusting and focusing a security camera quick and easy. No more running back and forth from the camera to the video monitor to get the picture just right.

Part Number: TOTE

17" Black & White CCTV Monitor

17" Black & White CCTV Security Monitor. 1000 TV Lines, BNC input & output. Compatible with all analog video recorders, analog multiplexers & digital DVR security CCTV systems. Ideal for surveillance CCTV applications. Although the unit is black and white it will display color cameras but only in gray scale.

Part Number: BE-8013

14" High-Res Security Monitor

14" Color CCTV Security Monitor, 420 line resolution. BNC Input/Output Connections. 120V AC. Compatible with all analog video security camera systems & video recorders. This unit will display black & white cameras in gray scale video. Other size units are available in 10" and 21" models.

Part Number: BE-8043

21" High-Res Security Monitor

The Honeywell HMC21 is a deluxe 21-inch color monitor that provides crisp detailed images. The monitor features easy to use onscreen display (OSD) menus and convenient front-panel pushbutton controls that make setup quick and easy. The HMC21 is ideal for worldwide applications. Installers can choose between five different languages for the setup menus, i.e., English, French, German, Italian, and Spanish. The monitor also features an auto-sensing feature that automatically detects whether a PAL or NTSC video source is connected and a universal power supply, allowing it to be powered by sources ranging from 90 to 264 VAC and 50 Hz or 60 Hz.

Part Number: HW-HMC21

17" LCD Monitor

Connect this 17" LCD display any EZWatch Pro or Armor Pro system and enjoy crisp detail and fast response times from your surveillance system. The slim design takes up little room on your desktop and includes a Kensington style lock port for theft deterrence. With a native resolution of 1280x1024 you have plenty of space to view multiple cameras at the same time. The high brightness and contrast ratio allows viewing even in brightly lit environments. Connects to any standard VGA port using the included cable.

Part Number: LCD17

19" LCD Computer Monitor

This stylish slim-bezel designed 19" liquid crystal display high resolution computer monitor displays a full 19" viewable area with 1280 x 1024 SXGA resolution. Featuring high brightness and excellent contrast ratio for sharp true to life images, and ultra-fast ClearMotiv video response delivers digital broadcast quality full motion video.

Part Number: LCD19

PC Keyboard & Mouse

PC computer keyboard and mouse. For use all computer based DVR systems. Quick and simple to set up, your keyboard and mouse will perform as fast and as reliably as any corded product. An 800dpi optical mouse responds instantly, tracks precisely, and provides maximum freedom. Includes everything needed to get started and a 1 year warranty.

Part Number: SKU1018

Wireless Keyboard and Mouse

Wireless computer keyboard and mouse. For use all computer based DVR systems. Quick and simple to set up, your keyboard and mouse will perform as fast and as reliably as any corded product. An 800dpi optical mouse responds instantly, tracks precisely, and provides maximum freedom. Includes everything needed to get started and a 1 year warranty.

Always in stock!

Part Number: VXKBM

NTSC Video To VGA Convertor

This innovative product allows you to convert a standard NTSC video signal to a VGA computer signal. This means that you can display video feeds from security cameras, video time lapse recorders or Armor-Pro hardware based digital video recorders on any standard computer monitor with a 15-pin VGA or SVGA input.

Part Number: AD01

2-Port KVM Switch

This KVM switch allows two computers to be controlled with one keyboard, one mouse and one monitor. The kit includes the switch box and all cables required. You can switch between the two computers by pushing a button on the control box.

Part Number: KVM-SWITCH

EZWatch Pro4 Gig Memory Stick

This portable memory stick is perfect for transferring select video samples from one PC based DVR to another. Simply plug the stick into a USB port on the PC and copy the video files on to it.

This handy tool is included with all our complete kits FREE!

Part Number: MOUSE-PAD

500ft EZ Spool Video/Power Siamese Cable

Siamese cable is convenient because it has both power and video cable wrapped in a single jacket so you don't have to run two separate cables. The EZ Spool 500ft roll of siamese cable comes in an innovative box that won't tangle or snag as you pull your cable out. The RG59 video cable will accept our twist-on BNC connectors or any other standard RG59 coax connectors and our power pigtaills are perfect for your cameras, no cutting or splicing the camera's pigtail is needed.

- Length: 500ft
- Type: EZ Spool Siamese Box
- Video: 95% copper shielded RG59
- Power: 18awg twisted pair, stranded

Part Number: 500-SIAMZ

Pre-made Video & Power Cables

The pre-made Siamese Video & Power Cable is all that is required to transmit power and video to one of our security cameras.

35' Cable:

65' Cable:

100' Cable:

500ft RG-59 Video Coax Cable

This easy dispensing box of 500 Feet of RG59 video coax cable with a 95% copper shielding is perfect for CCTV video security applications.

Part Number: 500RG59

500ft Security Camera Power

Provided in an easy dispensing box is 500 feet of non-plenum 18 gauge, 2 conductor cable. This cable is perfect to power up all of our 12 and 24 volt cameras.

Part Number: 500F/18/2

PTZ Communication Cable

1000' Box of 22 gauge, two conductor PTZ communication cable. Twisted, shielded, stranded, non-plenum. For use with any PTZ camera.

Part Number: 1000/22-2

RG-59 Coax BNC Twist-On Fitting

This is our standard twist on BNC video cable connector for RG59 coaxial cable. Once you correctly strip the RG-59 CCTV video cable, no special crimping tools are required as the fitting simply twists onto the cable.

Part Number: BNC-WST

BNC Coax Barrel Connector

If you ever move a video security camera and the wire is too short, you can use this RG59 Coax barrel connector to connect two video coax cables with BNC fittings together.

Part Number: BNC-BARR

Security Camera Power Supply

The plug in transformer has a 12 Volt DC output that is rated at 500mA. It is perfect for powering one of our surveillance cameras. The 12VDC plug-in transformer has a 6' cable, an led for status and a power plug-in that mates with our power pigtail for extending the wire lengths.

Part Number: 12VDC

4 to 8 Camera Power Supply

Provide power for up to 8 12v security cameras with this all-in-one power supply. Includes 8 individually fused terminals for surge protection in a rugged metal enclosure. Plugs into any standard power outlet with a flexible 100v-240v range and is wall mountable.

Part Number: 12VDC4

16 Camera Power Supply

Provide power for up to 16 12v security cameras with this all-in-one power supply. Includes 16 individually fused terminals for surge protection in a rugged metal enclosure. Plugs into any standard power outlet with a flexible 100v-240v range and is wall mountable.

Part Number: 12VDC16

Uninterruptible Power Supply

Protect your expensive electronic equipment with the TRP 900U Uninterruptible Power Supply Unit. The TRP 900U offers excellent surge protection and 900VA of standby power. Perfect for areas prone to black-outs and power surges.

Part Number: TRP900U

Power Supply Pig Tail

If you are using a standard 18 gauge 2 conductor cable for your camera power, you will use this adapter to connect the power cable to the camera.

Part Number: POWER-PIGTAIL

RCA To BNC Cable Adapter

This handy adapter is used to convert a standard BNC cable connection to an RCA input.

Part Number: RCA-BNC

Cash Register POS Interface

A point of sale (POS) transaction overlay can give you all the information you need to closely monitor the work being performed by employees at a cash register. The transaction overlay unit plugs into your register and the camera feed is looped through that same unit. It then takes information from the register (such as date/time, sale total, cash received and change given) and overlays it onto your video feed. Your digital video recorder records all of this information on the video and provides a permanent record of all transactions making it easy to identify errors or theft at the cash register. One unit (and camera) is required for each register.

Please call us during our extended support hours when ordering this item to ensure the correct interface is sent for your POS system. 1-866-241-3400.

Part Number: POS

Display Security Cameras On TV

A digital TV modulator takes the standard video feed from a camera or multiplexer and converts it to a cable TV signal. This allows you watch your video feed on any standard TV that is connected to your cable system. It has a digital readout that shows the current channel selected and supports audio as well.

You will need one of these units per camera or you can use a single unit on the output side of your multiplexer. The modulator also has video and audio adjustments to correct bad signals. Mounting hardware is included.

Part Number: TV-MOD

3000' Video & Data Transmitter

This kit is perfect for converting a PTZ security cameras coax video signals and control data to a signal that can be transmitted with a twisted pair wire up to 3000'. The kit includes two powered converts. One unit transmits video & data the other receives the video and data signals. Cat 5 cable or any twisted two pair copper cable is attached between the two units. The units do require power.

Up to 3000' Transmission, Transmits RS422 & RS485 Data Signals, Built-in Surge Protection, Plug In Power Supplies Included.

Part Number: CAVD

Video Baluns Cat-5 Transmitters

This kit is perfect for converting a security cameras coax video signal to a signal that can be transmitted with a twisted pair wire up to 1500'. The kit includes two converts. One unit attaches to the video output of the security camera and the other connects to the video input on the DVR or video recorder. Cat 5 cable or any twisted two pair copper cable is attached between the two units. The units do not require a power source.

Part Number: VB-KIT

1800' PTZ/Video Transmitter

This kit is perfect for converting a security cameras coax video signal and Pan-Tilt-Zoom control to a signal that can be transmitted with a twisted pair wire up to 1800'. The kit includes two converts. One unit attaches to the video and PTZ output of the security camera and the other connects to the video and PTZ input on the DVR or video recorder. Cat 5 cable or any twisted two pair copper cable is attached between the two units. The units do not require a power source.

Part Number: CBLNPT

Coax Cable Surge Protector

Protect your investment by adding these inline surge protectors to your new or existing CCTV security cameras. Blocks high voltage surges from hitting your DVR or Time-lapse recorder, or backwards through the line to your security cameras. Most manufacturers do not cover lightning strikes in their warranties. This is an easy and inexpensive way to add excellent protection for your security system.

Part Number: 15-SP01

Signal Amplifier Video & Audio

Extend the range of a security camera and/or microphone up to 900 additional feet by using this signal amplifier. Includes BNC video connectors and RCA audio connectors for easy hookup. Just plug in and adjust amplification to your needs. Powered by 12vdc 100mA.

Part Number: 15-VA01A

Lens Package

If you need to get a more detailed, close up image from your security camera that came with a wide angle lens originally you can purchase this lens package and choose from a variety of zoom options.

This is an excellent bargain for a 3 lens package that will allow you to change the viewing angle and zoom level of any 1/4" format security camera with a standard screw-in lens.

Most of our standard security cameras are offered with a wide angle 3.6mm lens giving you a 70° viewing angle that is great for general surveillance applications. In some cases it is beneficial to get a closer view of an area than what the standard lens offers. This pack will allow you the flexibility to change out lenses to achieve the perfect field of view every time.

Part Number: Lens Pack

600' IR Night Vision Illuminator

With a range of 600ft this night vision illuminator will compliment any IR sensitive Pan/Tilt/Zoom camera or long range zoom camera. Infrared can't be seen by the human eye, however digital CCTV security cameras see IR just as we see sunlight. Automatic turn-on/turn-off extends the life of the LEDs.

- Range: 300ft - 600ft
- Weather Proof: Yes
- Power: 12vdc

Part Number: 15-IL07

Coax Cable Stripper RG59 & RG6

The coax cable stripper makes preparing your surveillance camera connections quick and easy. It has adjustable blades so this stripper will work with both RG59 and RG6 coax cable. Works great for twist-on BNC connectors or crimp-on connectors. Just place the end of your cable into the stripper and with a few twists it is ready for your BNC connector.

Part Number: TOL-35

200' IR Illuminator

With a range of 200ft this night vision illuminator will compliment any IR sensitive Pan/Tilt/Zoom camera or long range zoom camera. Infrared can't be seen by the human eye, however digital CCTV security cameras see IR just as we see sunlight. Automatic turn-on/turn-off extends the life of the LEDs.

- Range: 100ft - 200ft
- Weather Proof

Part Number: IH50

Indoor IR Illuminator 30ft

A great accessory for indoor cameras without night vision, this illuminator will provide IR up to 30ft away at a 60 degree viewing angle. Most CCTV security cameras are sensitive to IR light which makes adding night vision to existing security cameras quick and easy.

Part Number: IL50

4 Camera Color Video Multiplexer

Color, high resolution video quad. Real time picture display. Video signal loss detection. Video gain adjustable by camera. 2X Video BNC outputs. For use with analog monitors and time lapse recorders.

Part Number: 15-VCR01

Payment Options

We accept Visa, MasterCard, Discover and American Express. Although all online transactions are encrypted and secure, if you do not feel comfortable transmitting your credit card number and other information over the internet, call us directly to place your order with one of our customer representatives. You may also fax a print-out of your shopping cart contents to 801-295-2191 and we'll charge your card manually. In order to process a faxed order, we will need the credit card number and expiration date along with the correct billing & shipping address, telephone number, and 3 digit security code.

Pre-payment with a personal check or company check is accepted. Mail your order information and check to the address listed below. Once the check has cleared your bank we will ship the order. This process takes 5-7 days after we have received the check before the order can be shipped.

Purchased orders are accepted from Fortune 500 corporate accounts, schools, hospitals and government agencies, no exceptions to this rule. You must complete the following processes: (1) Fax us (Automated Video Systems) a letter on your letterhead formally requesting us to accept your purchase orders; (2) Fax a copy of the PO detailing the equipment to be purchased to 801-295-2191. The terms are standard 30 day net. Please note that an account application may take 3-5 days to complete before the order is shipped out.

PayPal enables any individual or business with an email address to securely send payments online. You must have a PayPal account and have funds available in the account. If you do not have an account you can set one up in minutes and transfer money from your bank checking account into your PayPal account.

Keep things easy and fast by using your Google Checkout account to purchase any of our items. If you do not have a Google Checkout account or would like more information on its benefits please visit: <http://checkout.google.com/buyer/tour.html>

Due to the price variations and other market variables we reserve the right to adjust prices as required.

Support Hours

We maintain one of the largest in-house customer support departments in the business. Please call with any questions our knowledgeable support staff will be glad to help.

Support Hours: 8am to 5pm, weekdays, Mountain Standard Time.

45 Day Satisfaction Guarantee

We guarantee all of our products for complete satisfaction.

We offer the following return options during the first 45 days from the date of purchase. Return for Credit: Receive a 100% in-store credit of the total sale price including shipping which can be used towards the purchase of any items we offer. Replacement: We offer replacement of any defective or non operational item purchased. Return for Refund: Receive a refund of the total sale price minus the shipping costs and a 20% restocking fee. The following items are not eligible for refunds, only in-store credits EZ-EYE, EYE-SPY, BLACK-OPS, JMC-DV003. All wire purchases are final. No wire purchases are returnable or refundable.

Order Processing & Shipping

Our goal is to ship all orders the same day or the next after an order is placed. Occasionally due to stock levels or import delays we can not ship this quickly. If we can't ship your order within 1-2 business days after the order date we will contact you by email or phone and inform you of the delay. The cost of shipping via UPS Ground with-in the USA is included in the sale prices quoted. We can not guarantee a delivery date simply because UPS will not guarantee a delivery date for Ground shipments. Due to this, please allow 4-10 days for delivery depending on your location. If you require the equipment sooner please choose one of the other shipping options we offer such as UPS 3 Day, 2 Day or Over Night. The additional cost will be added to your order. Any orders which require shipping outside the USA will be shipped UPS World Express and the cost of shipping will be added to the total sale price.
